About Danish Crafts

Danish Crafts is an independent organization under the Danish Ministry of Culture and is responsible for promoting Danish crafts, encouraging high standards and increasing awareness of the qualities and potentials of contemporary Danish craft.

Danish Crafts opens the door to the international market, paving the way for talented craftspeople and designers: for example by acting as an umbrella organization for Danish representation at fairs, galleries and exhibitions like ICFF, SOFA Chicago and MoMA Retail, or by supporting exhibitions by individual artists.

In collaboration with Danish craftspeople and designers, Danish Crafts promotes an exquisite annual collection of fine craft and design products under the brand Crafts Collection. Customers are leading international design shops throughout the world, for example in New York, Tokyo, Paris, London, Berlin and Milan, as well as the major cities of the Scandinavian countries.

Danish Crafts always works in association with professional curators to ensure that the works featured are of the same high quality that has always characterized Danish Design.
